To Our Patients,

Our clinic is proud to be affiliated with the Alaska Family Practice Residency. Resident physicians who are specializing in family practice may be working with your doctor or midwife and your nurse to learn more about obstetrics. This will help prepare them to be excellent family doctors in rural Alaska and elsewhere.

Our clinic was selected to participate in this Alaska's first residency program, because of our dedication to quality care and high educational standards. The presence of residents will help us ensure that the time, thought and attention paid to your care will continue to be of the highest quality.

Please do not hesitate to introduce yourself to the residents. They enjoy learning about you as a person and we hope you will also enjoy educating these aspiring family physicians. However, if you feel uncomfortable having a resident assist in your care, please do not hesitate to talk to your provider.
